

**CASE STUDY**

## ST ANDREWS UNDERSHAFT

Is a grade 1 listed building constructed in the 1500s  
in the city of London

**Before:**

St Andrews Undershaft is a Church of England Church in the city of London. It is a grade 1 listed building and is administered by the nearby St Helens Bishopsgate Church.

- Construction was completed in 1532
- Rare example of a city church that survived the great fire and the Blitz.
- Still has majority of original features (Oak doors, stained glass, organ).

**During:**

JE Putney and Sons were awarded the contract to carry out the restoration on the internal walls throughout the church.

Three coats of lime haired Plaster were applied to the walls with a sponge rustic finish to blend seamlessly into the existing areas of the Church.

**Trade Techniques and Attention to detail:**

---

Three coats of lime haired Plaster

---

A sponge rustic finish to blend seamlessly

---

Finish in keeping with original 1532 construction

---

Lime plaster allows the building to breath decreasing the chances of cracking or damp.
